DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, lines 1-2, "the bidirectional acquisition and reproduction of images and sound" lacks proper antecedent basis.

In claim 1, lines 4-5 and 6-8, the phrase "preferably" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

In claim 1, lines 7-8, "the television camera" lacks proper antecedent basis.

In claim 1, line 10, "the gap" lacks proper antecedent basis.

In claim 1, line 11, "o" should be --to--.

In claim 1, line 12, "the framework" lacks proper antecedent basis.

In claim 1, line 12, "the reception angle" lacks proper antecedent basis.

In claim 1, lines 12-13, "the television cameras" lacks proper antecedent basis.

In claim 1, line 14, "the travel speed" lacks proper antecedent basis.

In claim 1, line 14, "the gap" lacks proper antecedent basis.

In claim 1, line 14, "the detection limit" lacks proper antecedent basis.

In claim 1, line 15, "the projected or reproduced image" lacks proper antecedent basis.

In claim 2, line 6, "for four for example" is nonsensical. Moreover, the phrase "for example" render the claim indefinite because it is unclear whether the limitation following the phrase is part of the claimed invention.

In claim 3, line 5, "the sole light-admission region" lacks proper antecedent basis.

In claim 4, lines 5 and 6, "the television camera" lacks proper antecedent basis.

In claim 4, line 9, "the projector" lacks proper antecedent basis.

In claim 4, line 10, "the camera" lacks proper antecedent basis.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Shirakura et al. show a moving display surface 72 with a gap 75 (Figures 14, 15).
